

*A Trusted Supplier of
Ophthalmic OPD & O.T. EYE Equipments*

I Care Industry

i Care Industry is a leading trading firm of Diagnostic Optical Instruments, medical furniture and hospital equipments. Our major customers consist of Government Hospitals, Private Hospitals, domestic and overseas dealers.

Our wide range of products consist of Auto Referecatometer, Lensometer, Vision Drums, Acuity Charts, Trail Lens Sets, Operation Tables, Refraction Chair Unit, Zoom Microscopes, Different Eye Testing Equipments and other miscellaneous products.

We strictly follow Fair Business Practices, believes in transparency and ethics. We are committed to providing our customers Economical, Cost Effective, High Quality Products and Services in the shortest possible time schedules.

We are committed to preserving our natural resources, we strictly monitor our processes to minimize the impact on our environment.

Quality Assurance

We maintain strict quality parameters at all levels of our operations and manufacturing process such as recruitment and retaining technically competent persons, procurement of quality raw-materials and components, Technically Advanced Machineries, R & D, prompt after-sales services, timely delivery and execution of orders. We are ISO 9001-2015 Certified / CE Compliant company.

AUTO REFRACTOMETER

Matronix Q30+

Specification

- The most advanced technique of a graph edition, make the graph measured quickly and clear.
- The precedent optical technique, consistent measurment and the accurate figure.
- IOL mode
- Accurate reliable
- Dual CCD camera technology with 5.7 inch hi-resolution color LCD display
- Latest SMPS power supply system, allows working perfect even at low voltage or fluctuating supply voltage.

DIGITAL AUTOLENSMETER

Specification

- 4.7" Hi-resolution Full-Graphic Color Led Monitor
- Green LED beam technology (wave length 545nm) measures the lenses faster with more accuracy & consistency, without ABBE value compensation.
- The new advanced simultaneous measurement of cluster areas (more than 100 points) with HARTMANN sensor provides access to more measurement data for precise and reliable readings.
- Accurately measures the transmittance of 10% of colored lenses. Automatically identify the type of lenses & switch to the respective measurement mode.
- A true user-friendly complete digital Auto Lensmeter with Printer, Color LED monitor, PD & UV measuring facilities.

DIGITAL AUTOLENSMETER

(Touch Panel with Tilt Screen)

- 5.6" Adjustable LCD color screen
- Large, Color and sensitive touch screen
- Accurate measurement.
- Progressive Measurement
- PD and UV function
- In-built thermal printer
- Both contact lens and hard lens are available.

Total Magnification 10x, 16x, and 25x

BINOCULAR MICROSCOPE

Slit image rotation 0 to 180 degree Filter Disc. Cobalt Filter, Green Filter, Yellow Filter, Natural density and open aperture Slit Diaphragm Disc Six apertures of 12, 9, 7, 3, and 0.2 mm and a wedge shaped Diaphragm fo infinitely variable slit lengths Halogen Lamp 12Volt 4.5 Amp

STANDARD ACCESSORIES

- 15x Eyepieces
- Replacing lamp. one piece for illumination unit
- Replacing Mirror
- Hruby Lens
- Plastic breath shield
- Testing rod
- Dust cover and fuse.

AUTO LENS EDGER

Specification

- Working Model: Automatic work with pattern
- Wheel Configuration : Glass Wheel, Cr Wheel, "V" Groove Wheel, Polishing Wheel, Poly Carbonate, Cutting & Polishing
- Available Lens range: 18 - 75mm
- Range of adjustable measurement : -6.0mm--+6.0mm (STEP: 0.05mm)
- Voltage: AC220/110V 50/60Hz
- Power: 500W
- Dimension: 530(L) X488(W) X400(H)mm
- Weight: 51 KG

KERATOMETER

- One position instrument. Measures both medials without changing optical system.
- Positive fixation, Permits rapid measurement of central corneal area.
- Precision objectives, Assures durability, Achromatic lenses.
- Dual eye-level sighting system. Facilitates horizontal alignment.
- Two-way adjustable head and chin rests.
- Simple vertical adjustment to fit patient.
- Coincidence focusing system. Positive measurements to .02 mm accuracy, 15x wide-angle piece.
- Measuring range : Radius of curvature.
9.4 - 6.4 mm (in 0.05 mm steps) Diopter 36-52 (in 0.25 steps)
Diopter 36_52(in 0.25 steps)

ZOOM INCLINED OPERATING MICROSCOPE FOR OPHTHALMOLOGY

Description	: Advance optical system designed exclusively for easier handling and versatility in Microsurgeries
Head	: Zoom Optical system
Eyepieces	: 10x paired wide field
Magnification	: 5x-25x
Working Distance	: F-200 mm
Illumination	: 15V/150W twin Halogen Lamps with coaxial through-the-lens fiber optics
Arm	: Counter balanced pantographic arm with 320 degree rotation
Stand	: Mobile floor stand on five caster wheels for easy handling and absolute ability
Power Supply	: AC 220-240 volts [110 volts on request]

O.T. TABLE (D-12)

Specification

O.T. Table (D-12) Custom-developed to satisfy all requirements of ophthalmologists. The patient can be efficiently prepared for the operation, operated on, and offered post-operative care on. Easy transformation from a smooth transportation chair into a versatile operation table. Mordent design, with various possible usage settings. Multi-Adjustable Head Rest can be tilted independently and smoothly height- adjusted, enabling the patients head to be kept in a convenient position. Ample leg-room for surgeons.

High load-bearing, stable Twin Wheel Castors with direction-locking. Hand control panel and foot control for all movements. Smooth, with Japanese DC Motor-controlled for up and down positioning.
